

Courses

Graduate Courses

Accounting (AC)

AC-520 Accounting Concepts

This course is designed to introduce students to the language of business. Students will learn the conceptual foundation of financial accounting and financial reporting of business activities. Assignments will focus on the development of insight about accounting in terms of measuring, recording, reporting, and interpreting economic transactions. Topics will include accrual and cash based measurements of profitability and financing, investing, and operating activities of businesses. This course will emphasize accounting for decision-making and the importance of ethics for business and accounting. 3 credits

AC-550 Special Topics

Selected topic studied in-depth within an Accounting frame of reference. 3 credits

AC-590 Independent Study

In this course, the student will, under the supervision of the program director, research and produce an integrative culminating project that draws together various aspects of the student's course of study. This project will require the student not only to engage new academic research and material, but the student must also draw deliberately upon learning done in previous classes in the major to support and develop the project. By the end of the semester, the project should be a clear expression of, and culminating investigation into the set of questions or themes that formed the basis of the major course of study. 3 credits

AC-638 Financial Statement Analysis

This course will provide students with an understanding of how firms communicate through financial statements. Students will examine the use of financial statement analysis as an integral part of the strategic analysis of firms. In examining financial planning concepts, students will create pro-forma spreadsheets. The regulatory and ethical issues related to financial statement preparation and presentation will be examined. Case studies will be utilized to demonstrate the practical application of financial statement analysis and projections. P: FIN 612. 3 credits

AC-650 Advanced Federal Income Taxation

This course will focus on income tax planning techniques for individuals at a more complex level. Students will examine tax planning through a lifecycle approach that will

touch on tax planning strategies individuals can utilize during their lifetimes and even after death. Topics such as tax planning for small business owners, tax planning during retirement, and tax planning for higher education costs will be covered along with many more throughout the course. Students will also expand their tax research skills as they learn how and why certain tax policies have been created and how they affect individual taxpayers. 3 credits

AC-651 Governmental and Nonprofit Accounting

This course is designed to provide a framework for understanding the special accounting and reporting requirements of nonprofit organizations. Students will examine the characteristics of governmental and nonprofit accounting with an emphasis on various fund types and account groups. Topics will include reporting, budgeting, and auditing concepts and practices. The ethical and legal issues faced by nonprofit organizations will be examined. 3 credits

AC-653 Accounting Information Systems

This course analyzes the methods used to gather, process, and communicate accounting information in business firms. Students will examine specific business transaction cycles, and manual and computerized accounting systems. Topics will include internal control, auditing techniques, and system documentation. Case studies will be utilized to demonstrate the practical application of various systems. 3 credits

AC-655 Ethics for Accounting Professionals

In this course, students will examine the ethical issues encountered in the accounting field. They will study the professional responsibilities outlined for accounting professionals and examine the ethical principles and practices of businesses. Students will study the regulations created by the passage of the Sarbanes-Oxley Act and discuss the current and potential impact of these regulations. Students will examine codes of conduct, stakeholder theory and the concepts of independence, objectivity, integrity, and public trust. Case studies will be used to illustrate these principles and students will be expected to demonstrate effective written communication skills. 3 credits

AC-657 Fraud Investigation

In this course, students will look at the proactive and reactive areas of fraud auditing and investigation. Students will examine decision making for the prevention, detection, investigation, and reporting of fraud. Different types of management fraud will be covered as well as discussions on consumer fraud, tax fraud, and identity fraud. 3 credits

AC-658 Taxation of Business Entities

In this course, students will examine the taxation of corporations, partnerships, and sole proprietorships. Students will prepare tax returns for business entities and explore the issues involved in tax planning and preparation. Problems will be worked manually and on the computer using tax preparation software. Topics include an overview of the

different forms of business entities and their income tax classifications, gross income, business deductions, and tax liability. 3 credits

AC-659 Global Financial Reporting

This course provides an overview of international accounting and financial reporting practices used in the United States and foreign countries. Students will compare financial reporting standards used by various jurisdictions. Students will examine International Reporting Financial Reporting Standards (IFRS) on a standard-by-standard basis and compare these standards to U.S. GAAP. Students will develop an understanding of these principles and how they are being applied in today's global business world. 3 credits

AC-661 Accounting Research Project

In this course, students will assess their accounting knowledge by completing practice exams from the Uniform Certified Public Accountants Examination. Based on the results, students will independently develop an accounting project focused on an area that needs further development. The extent and format of the project will be agreed upon with the instructor. Students will present their findings to the class at the end of the course. 3 credits

Art Therapy (AT)

AT-500 Foundations of Art Therapy

This is a survey course covering the origins of art therapy and its growth as a profession. This course also examines the theories and applications of art therapy in a variety of settings through lecture, reflection, presentations, and discussion. Students will learn how art therapy services are used in various treatment settings by gaining knowledge of the allied health professions (psychosocial rehabilitation disciplines, mental health professions, and other creative arts therapies) with whom art therapists work. 3 credits

AT-502 Fieldwork in Art Therapy

Students will be placed in "the field" in a therapeutic setting under the supervision of a Registered Art Therapist or other licensed professional. Students begin to get an overview of the duties and roles of the art therapist through direct observation, and begin to learn the skills of interacting with clients directly as well as utilizing clinical supervision on site. In addition to a minimum of 100 hours spent on site, students are required to attend and participate in a once weekly on-campus seminar. A minimum of 50 of the total placement hours needs to be in direct clinical contact with individuals, groups, or families; a minimum of 10 supervision hours are also required. P: AT 500, AT 504. 2 credits

AT-503 Professional Practices: Ethical Standards and Legal Issues

A seminar designed to promote the development of a professional identity for the art therapist and mental health counselor. Lectures, readings, and discussion will

focus on the history and recent developments in ethical and legal responsibility, confidentiality, malpractice, human rights, mental health law, professional organizations, and credentialing and licensing. It is preferable that this course be completed in the first year of the program. 3 credits

AT-504 Techniques in Art Therapy

A didactic and experiential course in the use of art in therapeutic settings. Students will engage in an exploration of art media and specific art therapy processes relating to a variety of populations, assessment, as well as the development of treatment goals and objectives. Students will gain experience in facilitating artistic expression, exploring the form and content of art, while developing skills in the understanding of artwork within various dimensions of personality, psychopathology, and treatment. 3 credits

AT-505 Art Therapy with Children/Adolescents

This course will focus on the theories of cognitive, psychosocial development, and artistic expression in children (ages 2-12). Students will gain an understanding of the role of art materials and effective therapeutic techniques for children; an understanding of the diverse theoretical approaches (e.g., developmental, cognitive, behavioral, psychoanalytic) used for these age groups; and learn to synthesize and apply specific art therapeutic approaches and strategies to age-related problems (e.g., bereavement, abuse, medical disorders, learning disabilities, school adjustment, peer group interactions). 3 credits

AT-507 Theory and Practice of Group Art Therapy

This course provides a theoretical and practical foundation for the integration of sound group therapy practices with a variety of art therapy structural components. Students will utilize both didactic and experiential learning models and be asked to develop skills in recognizing and responding ethically to transference and counter-transference issues that are unique to group therapy process. Emphasis will be on the many aspects of group therapy, including group composition, group process, identifying stages of the group, types of populations, group endings, and their unique applications in the field of art therapy. The class is a group with dynamics of its own, and each student will be asked to learn by participating in and at the same time observing the unfolding of group dynamics within this class setting. 3 credits

AT-508 Art Therapy in a Multicultural World

This course provides an exploration of the socio-cultural influences on the creative expressions of major cultural groups in the United States and the student's personal identity as it impacts the therapeutic relationship. Emphasis will be on understanding the mediating role of diversity in the development of the counseling relationship, modes of artistic expression, and the development of multicultural competencies. The instructor will coordinate readings, experiential exercises, and guest lectures to illuminate the

importance of multicultural awareness and competency in the practice of art therapy. 3 credits

AT-510 Art Therapy in Substance Abuse and Chemical Dependency Treatment

This course examines the special issues and problems for art therapists and counselors in providing services to clients with alcohol/drug abuse diagnoses and behavioral addictions. Emphasis will be placed on treatment approaches and practices appropriate for psychiatric hospitalization, inpatient rehabilitation programs, day treatment, and outpatient services. 1 credit

AT-512 Art Therapy Assessment

This course surveys important art therapy assessment tools. Using lecture, discussion and interactive participation, students gain exposure to and will be able to administer at least 6 standard art therapy assessment tools. Students will also be able to synthesize collected material from evaluations into a cohesive and concise written summary. 2 credits

AT-513 Art Therapy with Adults/Seniors

A survey of the developmental and theoretical issues involved in providing counseling and art therapy services to diverse clients across the span of adulthood. Through didactic and experiential means the physical and psychosocial effects of aging will be explored along with a review of various treatment techniques and intervention strategies. 3 credits

AT-514 Art Therapy and the Family

Art Therapy and the Family is an elective course designed to provide an overview of the field of family therapy and its various systemic perspectives. It incorporates the hands-on training necessary for gaining the basic professional skills of an art therapist working with diverse family forms. Students will examine their assumptions about what a "family" is, and how it develops within a social/cultural context. Didactic, group, and experiential formats emphasize the importance of the self of the therapist in the family system explored through self-reflection and collaboration. Ethical considerations and multicultural issues will be integrated into the content and process of the course. 2-3 credits

AT-520 Trauma Informed Art Therapy and Counseling

In this combined theoretical and art experiential course, students will understand the concepts of trauma-informed work in art therapy and counseling. Through the creation of their own response artwork, readings, and discussion, students will learn how art-based interventions support the essential features of trauma-informed care and post-traumatic growth: empathy, agency, safety, resilience, and empowerment. Students are required to demonstrate experimentation with and develop knowledge of a variety of art media and trauma informed counseling techniques. Students will develop increased empathy for the

client experience of trauma and an improved understanding of the role of the counselor/therapist in trauma treatment. 3 credits

AT-550 Special Topics

This elective seminar is structured with a focus on intensive immersion into the art-making process over a weekend, with exploration into a variety of topics relevant to the field of art therapy. Course topics vary each semester and include didactic and experiential learning. 1 credit

AT-580 Internship Seminar

The internship placement will provide students with the hands-on training necessary to gain the basic professional skills of an art therapist. Six credits of internship, 625 hours of placement time, are required, and can be completed over three to four semesters. A minimum of 312.5 of the total placement hours needs to be in direct clinical contact using art therapy with individuals, groups, or families. Internship placements will be offered in a variety of settings. A minimum of 63 of the total placement hours needs to be supervision hours. In addition to the supervised hours spent at the placement site, students will meet weekly with an on-campus supervision group to review and process the internship experience. Departmental permission is required. 6 credits over the span of 3 semesters

AT-590 Independent Study

In this course, the student will, under the supervision of the program director, research and produce an integrative culminating project that draws together various aspects of the student's course of study. This project will require the student not only to engage new academic research and material, but the student must also draw deliberately upon learning done in previous classes in the major to support and develop the project. By the end of the semester, the project should be a clear expression of, and culminating investigation into the set of questions or themes that formed the basis of the major course of study. 1-3 credits

Art Therapy / Psych (ATP)

ATP-599 Thesis Proposal Seminar

Each student is expected to formulate a research idea and develop a thesis proposal by the end of the semester. 3 credits

ATP-600 Thesis

Completion of ATP 599 is required before registration for this course. During this course the student will work with thesis advisors, the M.A.A.T.C. Director, and the Psychology Chairperson while completing an approved thesis proposal, collecting and analyzing data, and completing the final thesis. The thesis must be completed within two years of the date of the thesis proposal approval. P: ATP-599 2 credits

Criminal Justice (CJ)

CJ-510 Criminology

This course examines the development and application of theories of crime causation and social deviance. The course includes an assessment of the issues and problems involved in controlling crime and deviance in society. Students learn about the reason why some behavior is considered deviant and criminalized while other behaviors are not. 3 credits

CJ-512 Contemporary Issues in the Criminal Justice System

This course examines current issues facing the American criminal justice system. The course explores controversial topics such as the police use of force and discretion, as well as access to the justice system, organizational and legal issues related to decision-making within the criminal justice system, the role of the courts and the correctional system. 3 credits

CJ-514 Research Methods and Statistics

This course examines the research process and is designed to provide students with an understanding of the principles and practices of criminal justice empirical research. More specifically, methods of research and data analysis, as applied to the field of criminal justice, are presented. The application of these methods to criminal justice practice is demonstrated through various exercises. To better prepare capable professionals, students are taught both the language of scientific discourse and the ability to critically appraise empirical studies. To better prepare practitioners who are fair and respectful toward individuals from diverse backgrounds, research ethics and sensitivity to populations-at-risk are promoted. 3 credits

CJ-516 Criminal Justice Ethics

This course focuses upon constitutional and ethical issues as they affect the operation of the criminal justice system. Topics examined include: legal issues related to punishment, and the ethical responsibilities of criminal justice agents. 3 credits

CJ-521 Probation, Parole and Community-Based Corrections

More than 8 million adults in America (1 in 30) are under some form of correctional supervision, be it probation, jail, prison, or parole. Even those who are confined to high security prisons will eventually be paroled and supervised by professionals in the field of community-based corrections. This course examines the issues faced by correctional administrators seeking to punish and rehabilitate offenders, while trying to keep the communities in which they reside safe. 3 credits

CJ-530 Issues in Correctional Supervision

There are many issues facing correctional officers, including inmate mental health issues, use of force, sexual conduct, rape, narcotic abuse, inmate violence and gangs. Corrections supervisors, responsible for the conduct of their officers, need to understand the legal

issues involved in supervising officers and inmates in the correctional setting. Students will confront the issues by examining real cases that led to allegations of federal civil rights abuses against officers and supervisors in the correctional environment. 3 credits

CJ-535 The History of Corrections in America

The history of corrections in America began as soon as the first English settlers arrived in 1607. From the Jamestown settlement to today, correctional efforts have been marked by the best of intentions and the worst of abuses. Many different correctional techniques and facilities- shaming, whipping, branding, jails, prisons, and halfway houses- have been created in part, to punish, rehabilitate, or remove the poor and the criminal elements from urban streets. Even today, our nation struggles with rising incarceration rates, looking for new alternatives to incarceration. 3 credits

CJ-537 The Future of American Corrections

As America enters the twenty-first century the prison industry, which had been a growing industry for decades, is shrinking alongside state budgets. The issue presented by this problem is how well corrections professionals can respond to the growing demand to tighten budgets while improving ways to supervise and control released inmates in the community, many of whom continue their criminal careers. 3 credits

CJ-538 Youth, Culture and Crime

Although juveniles make up approximately 15 percent of the population, they account for almost 25 percent of all reported crime. Is there some facet of adolescent experience - a type of culture- that promotes the acceptance of deviant behavior and crime? This course examines the reasons behind the propensity for juveniles to commit crime far out of proportion to their percentage of the overall population. 3 credits

CJ-539 The History of Juvenile Justice in America

Long before the U.S. Supreme court transformed the juvenile justice system in 1967, the states were given wide latitude to mete out justice to juveniles. This course looks at the state of juvenile justice from the late 1700s through the 1960s. This course examines the court process and punishments to which juveniles were subjected, including the death penalty. 3 credits

CJ-541 The Juvenile Justice Process Today

The present state of juvenile/family courts in America can be traced back to the U.S. Supreme Court's 1967 *In re Gault* decision. That decision required that state juvenile courts recognize the need to treat juveniles more justly before the law, granting them many constitutional rights heretofore withheld. This course examines the court process to which juveniles are now subject (including removal to adult courts), seeking to determine if juveniles are indeed getting justice before the law. 3 credits

CJ-543 Issues in Juvenile Probation and Incarceration

Because of the view that most juvenile delinquents can be rehabilitated, family court judges seek to place most juveniles on probation rather than to incarcerate them. However, studies have shown that troubled juveniles often fail on probation and end up back in court facing the possibility of incarceration. This course examines the often troubling dilemma faced by criminal justice professionals working with juveniles as they try to ensure that juveniles who end up in juvenile court do not end up behind bars. 3 credits

CJ-545 Victimology

This course examines the relationship between criminals and their victims. In addition, the course covers the nature and extent of criminal victimization and its effect on American society, including the victims' rights movement. 3 credits

CJ-660 Criminal Justice Internship

This course allows students to use their theoretical knowledge in a practical environment. Students are required to spend 150 hours interning in a criminal justice agency, where they will maintain a log of their activities and confer with the faculty supervisor to discuss their individual progress. The student will also prepare a two-part paper, consisting of a literature review on a topic related to their internship (for example, a student doing an internship with a juvenile justice agency might consider reviewing the literature on some aspect of juvenile delinquency) and a description of their work experience. 3 credits

CJ-661 Criminal Justice Thesis

This is the program's capstone course. Student works with a faculty mentor to develop a research project that culminates in a thesis, which includes the following: 1) original research on a specific topic, 2) a critical review of relevant literature, 3) development and testing of a hypothesis (if applicable), 4) selection of the methodology (if applicable), 5) results of research, and 6) summary of the research findings and conclusions. 3 credits

Education (ED)

ED-501 Maps of Education: Tracing the Roots of Contemporary Public Education

A detailed study of the historical and philosophical roots of contemporary and public education. In light of the fundamental question of why do we educate children, this course examines the educational interplay of the State, community, family, and teaching professionals in different eras and the consequences, both intended and unintended, of legislative initiatives and educational reforms. It ends with the identification of a problem in education, which students will focus on responding to in their Capstone research. 3 credits

ED-503 Capstone Research Practicum I

This course begins by addressing the problem students identified in ED 501. Students will research literature on STEM pedagogy, curriculum, and educational technology that will help them work toward resolving the problem. The course focuses on guiding students through a rigorous review of the literature on their educational problem and potential solution. Students will leave the course with an annotated bibliography and literature review, which will become the first part of their capstone. 3 credits

ED-504 Japanese Lesson Study I

The Japanese Lesson Study process is a tool that teachers can use to develop/improve lessons and units in any academic discipline. One cycle of the process involves teams of teachers collaboratively planning a lesson, implementing the lesson while other team members observe, and then engaging in a post-lesson discussion to garner feedback about how the lesson can be improved. This course will focus on providing the history, rationale, and documented effectiveness of lesson study as a teaching/professional development tool, as well as providing detailed instruction on how to engage in lesson study most effectively. As part of the course, candidates will form lesson study teams and collaboratively develop a lesson (ideally an interdisciplinary one) to be taught, observed, and discussed during the academic year. Candidates will share these lessons and their lesson study experiences in Japanese Lesson Study II, the second course in this sequence. 3 credits

ED-510 Curriculum and Methods of STEM

This course seeks to answer two main questions—What is STEM, and what is its purpose? Topics that will be considered include what the different STEM disciplines are, how the disciplines fit together, what engineering by design is and why it is important, strategies that support inquiry and problem-solving skills, and student-centered instructional methods used in STEM. Another focus of the course will include an emphasis on STEM jobs and careers, as well as why students should be choosing and preparing themselves for STEM-related fields, particularly those with underrepresented populations. 3 credits

ED-512 Foundations of Blended, Remote & Online Learning

This course will give students the opportunity to explore a range of course delivery modalities and online learning platforms. With a specific focus on current learning management systems and software, students will learn principles of course administration and development in a variety of learning environments. 3 credits

ED-530 Curriculum and Methods of STEM - Certificate Track

This course seeks to answer two main questions—What is STEM, and what is its purpose? Topics that will be considered include what the different STEM disciplines are, how the disciplines fit together, what engineering by design is and why it is important, strategies that support inquiry and problem-solving skills, and student-centered instructional methods used in STEM. Another focus of the course will include an emphasis on STEM

jobs and careers, as well as why students should be choosing and preparing themselves for STEM-related fields, particularly those with underrepresented populations. 3 credits

ED-604 Engaging Diverse Audiences

Given the increasingly multicultural student population in American schools of the twenty- first century, it is important for all educators to become sensitive to diverse cultural contexts, and to establish classroom climates in which all students will feel they are welcome and that they have the ability to succeed. This course addresses a wide range of issues facing teachers in a multicultural society, and leads those enrolled in the course to draw parallels and contrasts between their own culture and a variety of other cultures. 3 credits

ED-607 Principles of Technology/STEM and Assessment

This course focuses on the various technological tools that can be used to enhance instruction and better evaluate student learning in STEM courses. Candidates will be introduced to various free and commercially available software as well as internet sources. These technological tools will bolster teachers' curricula (e.g., scientific modeling/simulations, lesson plans at NASA-for Educators), professional development, and ability to adaptively select formative and summative assessments to gauge student learning and inform subsequent instruction. 3 credits

ED-610 Engaging Diverse Audiences - Certificate Track

Given the increasingly multicultural student population in American schools of the twenty- first century, it is important for all educators to become sensitive to diverse cultural contexts, and to establish classroom climates in which all students will feel they are welcome and that they have the ability to succeed. This course addresses a wide range of issues facing teachers in a multicultural society, and leads those enrolled in the course to draw parallels and contrasts between their own culture and a variety of other cultures. 3 credits

ED-611 Techniques for Accessibility and Inclusion - Certificate Track

This course is based on the truth that all students can be successful. Participants will learn about types of disabilities as well as research based-strategies to assist the development of all students. Differentiation in instructional design and implementation will be explored. Students will use Universal Design for Learning to plan STEM lessons and design units of study with inclusivity at the forefront. 3 credits

ED-612 Principles of Technology/STEM and Assessment - Certificate Track

This course focuses on the various technological tools that can be used to enhance instruction and better evaluate student learning in STEM courses. Candidates will be introduced to various free and commercially available software as well as internet sources. These technological tools will bolster teachers' curricula (e.g., scientific modeling/simulations, lesson plans at NASA-for Educators), professional development,

and ability to adaptively select formative and summative assessments to gauge student learning and inform subsequent instruction. 3 credits

ED-623 Gamification and Learner Motivation

Engaging and motivating learners is an important aspect of success in virtual and in-person learning environments. With a focus on learner retention and encouragement of learning, this course will highlight various theories of human motivation, principles of gamification of learning, and address the underlying elements of learner engagement. 3 credits

ED-628 Techniques for Accessibility and Inclusion

This course is based on the truth that all students can be successful. Participants will learn about types of disabilities as well as research based-strategies to assist the development of all students. Differentiation in instructional design and implementation will be explored. Students will use Universal Design for Learning to plan STEM lessons and design units of study with inclusivity at the forefront. 3 credits

ED-675 Japanese Lesson Study II

Students in this course and those incoming students in Lesson Study I will be combined, and candidates in Lesson Study II will take on a leadership role. First, students in this course will share their lessons/lesson study experiences that took place during the academic year following their Lesson Study I course. That will be used as a springboard for these students and the instructors of this course to co-teach those in Lesson Study I about the lesson study process and how to conduct it. Lesson Study II students will split time between revising the lesson that they developed during the academic year and providing Lesson Study I support and leadership as the new cohort engages in the lesson study process for the first time. P: ED 504. 3 credits

ED-677 Leadership in STEM

This course occurs close to the end of the program and will help graduates to become agents of change in communities of which they are members (school, district, state, etc.). Some of the topics that will be examined include a review of local and non-local STEM programs as well as how to initiate a school/district STEM program (shaping policy and providing advocacy); provide professional learning for colleagues (mentor beginning STEM teachers, becoming a STEM instructional coach, help to form teacher learning teams); network (with other programs and leaders); disseminate/publish ideas, observations, and materials; and how to search for/apply for funding, to name a few. 3 credits

ED-680 Capstone Research Practicum II

Each student enrolled in this course will work with an advisor and will select a project related to STEM instruction in the general education classroom. They will use the

problem and research they did in previous courses to write a grant proposal to bring a STEM-related project/ curriculum into their classroom. 3 credits

English (EN)

EN-500 Writing Portfolio

This course serves as the central mentoring experience for M.F.A. students, in which the student develops a body of work from classes and in preparation for the Master Project. An individual advisor guides the writer in the process of honing the craft and developing the writing portfolio. Through guided revision, students will emerge from the program with a portfolio of work reflecting their strengths as writers. Students will also benefit from responses from other students in the program through periodic workshop meetings that will build a community of writers. 1 credit. Students are required to complete 4 credits throughout the program.

EN-521 Readings in Fiction

In this course, students will take measure of the contemporary literary scene by extensive and intensive reading of recently published short stories, novellas, and novels. In addition to knowing their literary history, M.F.A. students must be prepared to enter into the conversation currently happening in their chosen field. This course will foreground the debates raging in academia and on the bookshelf, for example, the controversy over "cultural appropriation" sparked by Lionel Shriver's 2016 speech and the #ownvoices movement. We will examine the difference between innovation and trendiness. Students will emerge with the context they need to locate their voices in the writing worlds they wish to inhabit (or subvert). 4 credits

EN-522 Readings in Poetry

In this course, students will take measure of the contemporary poetry scene by extensive and intensive reading of recently published poetry, including major prize-winning collections (Pulitzer, National Book Award, etc.) and anthologies like the Best American Poetry series. In addition to knowing their literary history, M.F.A. students must be prepared to enter into the conversation currently happening in their chosen field. This course will foreground the ongoing debates in the poetry world- for example, the question of accessibility and whether rhymed and metered verse is still relevant. We will examine the difference between innovation and trendiness. Students will emerge with the context they need to locate their voices in the writing worlds they wish to inhabit (or subvert). 4 credits

EN-523 Readings in Nonfiction

In this course, students will take measure of the contemporary literary scene by extensive and intensive reading of recently published essays, memoirs, and journalism. In addition to knowing their literary history, M.F.A. students must be prepared to enter into the conversation currently happening in their chosen field. This course will foreground

the debates raging in academia and on the bookshelf, for example, questions of ethical representation in nonfiction. We will examine the difference between innovation and trendiness. Students will emerge with the context they need to locate their voices in the writing worlds they wish to inhabit (or subvert). 4 credits

EN-541 The Creative Process

An examination of the creative process including the stages, elements, and the products. Students learn ways to explore levels of creative unconsciousness and how and why the creative process works. Topics include: inspiration, authenticity, vision, voice, "performicity." How do creative individuals achieve their ends? Students will develop a critical understanding of their own deepest level of imaginative experience. Also in this course, they will begin to consider an original and artistic approach that will culminate in a directed writing (Master) project in EN 692. 4 credits

EN-543 Seminar in Poetry I

Advanced seminar course(s) aimed at intensive study in exploring and developing students' interests in poetic form and technique. Through a workshop approach that emphasizes process, students will share impressions and analyses as they study approaches and read and write different poetic forms. These courses seek to foster an appreciation for poetry as a genre and provide an occasion for crafting original work. 4 credits

EN-544 Seminar in Fiction I

Advanced seminar course(s) aimed at intensive study in exploring and developing students' interests in the form and techniques of creative fiction. Through a workshop approach that emphasizes process, students will share impressions and analyses as they study approaches and read and write different fictional forms. These courses seek to foster an appreciation for fiction as a genre and provide an occasion for crafting original work. 4 credits

EN-545 Seminar in Nonfiction I

Advanced seminar course(s) aimed at intensive study in exploring and developing students' interests in the form and techniques of nonfiction. Through a workshop approach that emphasizes process, students will share impressions and analyses as they study approaches and read and write different literary forms. These courses seek to foster an appreciation for nonfiction as a genre and provide an occasion for crafting original work. 4 credits

EN-551 The Literary Marketplace

This is a course that centers on the methodology of publicity and promotion and commonly used tools and techniques that can be employed by writers to attract readers. Students will engage in an analysis of the contemporary writer's market, from major publishers, to independent presses, to the Internet. By researching trends and developing

an understanding of how their writing fits into market categories and compares with similar works, students will develop an understanding of how to frame writing projects for agents and publishers. A strong focus is placed on website and social media techniques for self-promotion. This course may include visits from guest publishers and authors. 4 credits

EN-643 Seminar in Poetry II

Advanced seminar course(s) aimed at intensive study in exploring and developing students' interests in poetic form and technique. Through a workshop approach that emphasizes process, students will share impressions and analyses as they study approaches and read and write different poetic forms. These courses seek to foster an appreciation for poetry as a genre and provide an occasion for crafting original work. 4 credits

EN-644 Seminar in Fiction II

Advanced seminar course(s) aimed at intensive study in exploring and developing students' interests in the form and techniques of creative fiction. Through a workshop approach that emphasizes process, students will share impressions and analyses as they study approaches and read and write different fictional forms. These courses seek to foster an appreciation for fiction as a genre and provide an occasion for crafting original work. 4 credits

EN-645 Seminar in Nonfiction II

Advanced seminar course(s) aimed at intensive study in exploring and developing students' interests in the form and techniques of nonfiction. Through a workshop approach that emphasizes process, students will share impressions and analyses as they study approaches and read and write different literary forms. These courses seek to foster an appreciation for nonfiction as a genre and provide an occasion for crafting original work. 4 credits

EN-692 Master Project

The Master Project is the culminating product of the M.F.A. in Writing. Students will begin in the fall of the first year, and continue throughout the program, to create, revisit, develop, and refine a body of substantial work in their chosen genre. Drawing on extensive background reading of relevant literary works, each student will prepare a manuscript that meets program standards for professional work in one of the following forms: a book-length manuscript of collected poems; a book-length collection of short stories; a completed novel; a book-length manuscript of non-fiction (autobiography, memoir, a sequence of personal essays). Master Projects will be housed in the Albertus Magnus College Library upon completion and final approval. 8 credits

Finance (FIN)

FIN-550 Special Topics

Selected topic studied in-depth within a Finance frame of reference. 3 credits

FIN-590 Independent Study

In this course, the student will, under the supervision of the program director, research and produce an integrative culminating project that draws together various aspects of the student's course of study. This project will require the student not only to engage new academic research and material, but the student must also draw deliberately upon learning done in previous classes in the major to support and develop the project. By the end of the semester, the project should be a clear expression of, and culminating investigation into the set of questions or themes that formed the basis of the major course of study. 3 credits

FIN-612 Financial Theory

In this course, students will study the tools and methodologies utilized by financial managers. Students will analyze financial information with emphasis on utilizing this information to make effective and ethical managerial decisions. Topics will include forecasting and planning, investment and financing decisions, cash flows, and financial markets. Students will demonstrate advanced understanding of these topics by analyzing case studies based on real world situations. P: AC 520. 3 credits

FIN-629 Advanced Corporate Financial Management

This course will cover advanced topics in corporate finance. Topics will focus on financial projections and modeling, capital structure optimization, equity and debt financing, capital budgeting, cash flow analysis, dividend policy, valuation, and corporate governance issues. P: FIN 612. 3 credits

FIN-631 Banking & Financial Markets

This course will cover topics relevant to the financial markets and the banking system in the U.S. Topics will include an assessment of monetary policy, fiscal policy, regulatory policy, the money markets, currency markets, debt markets, and the capital markets. There will be an emphasis on the relationship between government policies and the behavior of financial markets. P: FIN 612. 3 credits.

FIN-633 Derivatives Markets & Risk Management

The course will provide an in-depth understanding of the markets for derivatives. Topics will include the following: stock option pricing and strategies, valuation of forward and futures contracts, credit default swaps, arbitrage, Value at Risk (VAR), and advanced forms of risk management. P: FIN 612. 3 credits

FIN-649 Essentials of Personal Financial Planning

This course will introduce all the primary financial planning topics that will be tested on the Personal Financial Specialist examination. Students will learn about the fundamentals of financial planning, insurance planning, income tax planning, investment planning, retirement planning, and estate planning throughout this course. Students will also work on practical case studies in order to fully grasp the financial planning concepts discussed and see how each area of planning is connected to one another. 3 credits

Healthcare Administration (MH)

MH-512 Ethical Issues in Healthcare

In this course, students explore a wide variety of ethical issues presented in a healthcare setting through the use of case studies. The course will challenge students to refine their own values and moral principles in relation to healthcare issues, consider the impact of various professional codes of ethics, and apply the four principles of healthcare ethics to resolve ethical conflicts. 3 credits

MH-514 Statistics for Healthcare Managers

In this course, students will learn how to apply advanced statistical methods to assist in making business decisions in a healthcare setting, including one-, two- and k-sample problems, regression, elementary factorial and repeated measures designs, and covariance. Students will also be introduced to the application of statistical methods used in behavioral science, including multiple regression and related multivariate techniques. 3 credits

MH-536 Strategic Management of Healthcare Organizations

This course examines how healthcare organizations can achieve a competitive advantage in an environment disrupted by unpredictable legislative and regulatory shifts, technological change, competition from rivals, and other economic, social, and political challenges. 3 credits

MH-660 Healthcare Administration Capstone

This course will be a faculty-supervised project that is team-based. Students will prepare a project report based on a real-world healthcare problem that demonstrates competence in all five HLA domains of healthcare administration and make an oral presentation of their recommendations for addressing the problem. 3 credits

Human Services (HS)

HS-504 Writing in the Social Sciences

This is a required course in the program, which assists students to improve their professional writing skills in the field. It is a foundational course, training students in human services professional writing. The course includes reading, summarizing, and

evaluating several professionally published articles in the field of Human Services. Appropriate sentence construction, grammar, critical thinking and proficiency with APA format and proper citation are expected. In addition, students are required to write a major paper, demonstrating the skills acquired throughout the mod. 3 credits

HS-514 Resolving Conflict Through Dialogue

The meaning of conflict resolution adopted in this course is focused on peaceful, non-violent mechanisms, spanning formal and informal interactions and bargaining between disputants to reach procedural and substantive solutions. Levels of conflicts and resolution settings are often differentiated by identifying the adversaries, whether they are nation-states, ethnic groups, business or political organizations, community groups, neighbors, or individuals. Students will examine these perspectives in order to understand various layers where conflicts arise, and to make comparisons across issues and participants noting similarities and contrasts in resolution, effort, and achievement. 3 credits

HS-530 Ethical and Legal Issues in Human Services

This course focuses on ethical and legal issues relevant to the delivery of human services. Topics include ethical principles and ethical issues in human services; professional codes of ethics related to human service managers and human service delivery systems; the U.S. legal system and its role in human service delivery systems; and the legal and ethical issues related to vulnerable populations, behavioral interventions, self-determination and self-advocacy, confidentiality, and professional boundaries. 3 credits

HS-531 Theory, Practice, Trends and Multicultural Issues in Human Services

This course focuses on the range of populations served and needs addressed by human services. Topics include diversity issues related to clarifying expectations, dealing effectively with conflict, societal context, ethical behavior, techniques for building rapport in diverse groups, problem-solving, decision-making, and predicting outcomes. 3 credits

HS-550 Special Topics

Selected topic studied in-depth within a Human Services frame of reference. 3 credits

HS-580 Field Experience

This course will provide students with a field-based experience in a private or public human service agency under the supervision of agency staff as well as a college faculty member. Students who have a minimum of five years' direct client or supervisory experience in an accredited human service agency within the last eight years may waive part or all of the field experience. If the field experience is waived, the student must choose an action research project (PY 581) or one to two additional three credit courses related to human services. Either course is an onsite course and runs for a full semester. 3-6 credits.

HS-660 Capstone Project

Students choose a relevant human services issue (substance abuse, homelessness, domestic violence etc.) to research. Students will extensively review the professional literature and describe four programs or agencies in Connecticut that serve this specific population. In addition, students will perform a thorough and in-depth evaluation of a separate program related to this issue, including recommendations for improvement in services. 3 credits

Instructional Design/Technolog (IDT)

IDT-500 Introduction to Curriculum Design

The Introduction to Curriculum Design course will equip students with the foundational skills and knowledge required of instructional designers. With a focus on principles of curricular alignment, design of learning outcomes, and various curriculum formats, this course offers students the opportunity to engage with the core aspects of instructional design. 3 credits

IDT-512 Foundations of Blended, Remote & Online Learning

This course will give students the opportunity to explore a range of course delivery modalities and online learning platforms. With a specific focus on current learning management systems and software, students will learn principles of course administration and development in a variety of learning environments. 3 credits

IDT-523 Principles of Curriculum Assessment

The inclusion of both formative and summative assessments in learning environments is an essential component of effective course and training delivery, helping to gauge learner progress and competency with the materials. Principles of Curriculum Assessment will provide students with the skills and knowledge to develop, design, and administer assessment instruments and methods in learning environments. Topics will include assessment methods, promoting integrity of learner assessment, reliability, validity, and alignment with course objectives. 3 credits

IDT-534 Collaborative Project Management

Collaboration and management of projects are essential skills required of instructional design teams. This course will give students the opportunity to develop skills of collaboration, management of project scope, and adherence to deadlines, while using current project management technology to create deliverables for clients. Emphasis will be placed on effective communication and collaboration using common project management software and techniques. 3 credits

IDT-542 Developing Multimedia Content

Developing rich, interactive content for courses and training environments is an essential skill of instructional designers. Working with subject matter experts, and utilizing a

variety of advanced multimedia software, students will design and develop a range of engaging multimedia content for learning environments and online courses. In addition, this course will focus on best practices for creating multimedia content, including issues of accessibility and content formats. 3 credits

IDT-550 Special Topics

Selected topic studied in-depth within an Instructional Design and Learning Technology frame of reference. 3 credits

IDT-611 Designing for Accessibility and Inclusion

It is imperative that training and course content be designed in a way which enables learners of all backgrounds and abilities to access it. This course will introduce students to best practices around accessibility, reaching audiences with diverse needs, and promoting equity within course design. Concepts such as universal design for learning, differentiated instruction, and course accommodations will be covered. 3 credits

IDT-623 Gamification and Learner Motivation

Engaging and motivating learners is an important aspect of success in virtual and in-person learning environments. With a focus on learner retention and encouragement of learning, this course will highlight various theories of human motivation, principles of gamification of learning, and address the underlying elements of learner engagement. 3 credits

IDT-637 Engaging Diverse Audiences

The role of instructional designers often includes the design and delivery of professional development and learning activities. This course will focus on methods to engage and connect with learners from diverse backgrounds and areas of expertise. In addition to developing skills of public speaking and designing effective training materials, students will learn how to foster an environment of inclusion and equity in their instructional design work. 3 credits

IDT-650 Future Directions of Learning Design

Adaptive learning platforms, augmented reality, artificial intelligence, learning analytics, and other progressive concepts are the future of educational design and delivery. This course will expose students to a broad range of tools and techniques that are being developed to progress learning design and delivery in new and novel directions. Students will be encouraged to think critically and creatively about the effectiveness, ethical issues, and potential societal impacts of the tools that will drive learning in the future. 3 credits

IDT-660 Capstone Portfolio

As a culminating course in the Instructional Design program, the Capstone course serves as an opportunity for students to demonstrate their cumulative learning, skills,

and knowledge regarding effective design. Working with faculty and subject matter experts, students will design and develop an interactive, multimedia project to serve as their capstone. Student work and projects will incorporate aspects of the program curriculum, including elements of accessibility, multimedia, project management, and learning assessment. P: Students must have completed 21 credits or more in the program to enroll in the Capstone course. 3 credits

Management/Organization Lead. (MOL)

MOL-501 Leadership in Theory and Practice

Leadership in Theory and Practice introduces students to the study of leadership and management and differentiates between the two disciplines. The course examines seminal and contemporary theories with a focus on the need for and application of both in an organizational setting. Research skills for graduate school are also introduced and explored with students beginning to formulate research ideas which can be developed throughout this graduate program. 3 credits

MOL-502 Leadership and the New Science: Research Design and Methods to Understand Leadership

This course provides a wide-view background of the relationship between scientific thinking, decision making, research processes and design, leadership and organizational life. Students will explore the implications of the differing methods of leadership research practices and theories of change on our ideas and practices of leadership in organizations. Students will also review the fundamentals of the scientific research process and will focus on the use of qualitative and quantitative research methods as an appropriate response to understanding how and why organizations and leadership within them function as they do. 3 credits

MOL-505 Moral Leadership: Defining the Character of Individuals in Organizations

In this course we will explore two important and related topics: leadership and ethics in organizations. Questions that will be explored include: What is leadership? How does it differ from management? Does it have an impact on organizational mission and performance? Where are leaders in organizations, and what are their roles? What roles do leaders play in shaping the culture and in shaping what is considered right and wrong within the organization? Can ethical reasoning be taught, and if so, how can one learn the needed skills? How can one learn to make right vs. right decisions and explain their decisions to others? Since all organizational decisions are ultimately made and implemented by individuals, we will focus primarily on practical aspects of leadership and ethical decision-making as they impact the individual, rather than looking at more broad issues such as the social responsibility of businesses or organizations. 3 credits

MOL-506 Organizational Behavior

This course examines the theoretical assumptions of organizational behavior and the issues and challenges that arise when managing and leading. Students will investigate the interrelationships between the individual, the group, and the organization. The course will emphasize managerial practices needed in a variety of settings and the application of these methods to realistic situations. Students will be required to demonstrate effective communication skills throughout the course. 3 credits

MOL-507 Critical Thinking and Decision Making

Developing leadership competencies to manage quality processes for organizations today is essential for sustaining longterm growth and competitiveness in all industries. To do this effectively, solid critical thinking skills must be utilized. Course participants will evaluate their personal and team decision-making skills that will assist in making effective decisions that link to the overarching quality management philosophies of the organization. The psychology of decision making will also be explored emphasizing the biases and motivations which may prejudice decision-making abilities. Participants will critically analyze contemporary decisions in society and apply the course material to a positive organizational context. 3 credits

MOL-507_23 Critical Thinking and Decision Making

Seminar participants will evaluate their own decision making skills and consider optimal ways of reaching decisions individually and in a group context. The psychology of decision making will be explored with an emphasis on the biases and motivations which may prejudice our decision making abilities. Participants will critically analyze contemporary decisions in society and apply the course material to a positive organizational context. Students will continue to develop their research techniques and will use the critical thinking skills they develop to identify, explore, and research an issue of their choosing. 3 credits

MOL-508 Servant Leadership

This course is designed as a study of the theory and practice of Servant Leadership. It is also an exploration of how students can apply Servant Leadership in their own lives. Students will explore the gulf between those who lead in order to serve others, and those who lead in order to serve self. This exploration will be undertaken from a variety of angles. Students will trace the origins of the Servant Leader concept and will explore modern-day examples of Servant Leadership in action through the writings of top management thinkers. Students will tie it all together by constructing practical applications of the Servant Leader theory to be used at work, school, and/or in their personal lives. 3 credits

MOL-510 Human Resource Management in a Changing Environment

This course is a study of techniques and skills necessary to manage and effectively guide human resources in a rapidly changing technological environment. Emphasis is on

formulation and implementation of strategies to understand, guide, and develop human resources within the modern organization. It covers analysis of humanistic and ethical issues facing management and employees in the changing workforce and behavioristic concerns as experienced within organizations. 3 credits

MOL-512 Leading an Inclusive Workplace

This course will enable students to understand the importance of valuing and managing the diversity of people. Students will be asked to challenge themselves and their ideas as they work through different workplace issues related to diversity and leadership, looking at issues from the viewpoint of a leader. Critical thinking will be essential when it comes to examining ideas, feelings, and plans related to diversity and leadership issues. Patience and tolerance of ideas and each other will be key. 3 credits

MOL-512_23 Leadership and Diversity

This course will enable students to understand the importance of valuing and managing the diversity of people. Students will be asked to challenge themselves and their ideas as they work through different workplace issues related to diversity and leadership, looking at issues from the viewpoint of a leader. Critical thinking will be essential when it comes to examining ideas, feelings, and plans related to diversity and leadership issues. Patience and tolerance of ideas and each other will be key. 3 credits

MOL-514 Conflict Resolution

The meaning of conflict resolution adopted in this course is focused on peaceful, nonviolent mechanisms, spanning formal and informal interactions and bargaining between disputants to reach procedural and substantive solutions. Levels of conflicts and resolution settings are often differentiated by identifying the adversaries, whether they are nation-states, ethnic groups, business or political organizations, community groups, neighbors, or individuals. We will examine these perspectives in order to understand various layers where conflicts arise, and to make comparisons across issues and participants noting similarities and contrasts in resolution manner, effort, and achievement. 3 credits

MOL-516 Community Leadership

Community Leadership will bring students to a deeper understanding of the role of leaders in the communities in which they live and work. Students will explore the impact of social and individual identities, and will understand the importance of serving as leaders within the community. Students will reflect upon, evaluate, and identify personal leadership characteristics in the context of serving a cause and community they are passionate about and discern effective ways to promote positive leadership to those around them. 3 credits

MOL-518 Managing Quality

Developing leadership competencies to manage quality processes for organizations today is essential for sustaining long-term growth and competitiveness in all industries for example: Health, Academia, Service and Manufacturing. This class will explore the theories, concepts and best practices of managing quality. Topics will include: Total Quality Management (TQM), Six Sigma, Lean Principles and Agile Processes. The course will assist students to understand the need for aligning quality management with the strategic and leadership objectives in organizations. Students will be able to link their theoretical learning with actual applications in their business world. 3 credits

MOL-601 Coaching and Talent Management

In an era where organizational success hinges on effective talent management and transformative coaching, this course offers a deep dive into cutting-edge strategies and practices. This course is designed for talent leaders or individual contributors who aspire to excel in talent development and organizational growth. MOL 601 combines theoretical foundations with real-world applications, fostering a dynamic learning environment where students will explore strategic talent management, the psychology of coaching, coaching techniques, and the use of data driven decision making in assessing and designing talent management initiatives 3 credits

MOL-601_23 Team Building

Participants will study team leadership and teambuilding through a series of exercises, a behavioral assessment, group discussions, and readings. Key learning components encompass: enhancing the quality of participation in a team environment, modeling effective leadership, leading groups, how to communicate more effectively, creative thinking and purposeful behavior directed towards achieving team goals. Each team will create a Team Covenant that will assist them through their academic career and one where the application will transfer into their professional lives. In addition learners will create a personal leadership development program to guide them in their professional careers. 3 credits

MOL-605 Global Management

This course addresses practical skills for global managers. It examines common issues and best practices for managing a global workforce as well as relationships with important partners and customers. Students will examine the changing international business environment and assess the challenges involved in establishing and managing international operations and the problems inherent in these transactions. During this course, case studies will be utilized and students will be required to demonstrate effective critical thinking skills. 3 credits

MOL-620 Entrepreneurial Thinking: Innovation and Creativity in Creating Value

In this course learners will take a self-reflective path introducing them to the benefits of creative and innovative thought. Students will review cross-disciplinary theories of innovation, creativity and entrepreneurship written by seminal authors and will begin to formulate ideas which will be further examined in their applied research project in MOL 630. 3 credits

MOL-630 The Capstone: Practical Leadership

In the Capstone Course for the Master of Science in Management and Organizational Leadership students will apply what they have learned throughout their program to practice. Utilizing the FLIGBY Leadership Simulation students will take on the persona of the new General Manager of an organization and will lead their team to high levels of performance and job satisfaction. Through various assignments and discussions students will reflect on their master's program and will also look ahead towards their future by developing a Personal Development Plan that will guide them in further cultivating and practicing their leadership. 3 credits

MOL-630_23 Applied Research Project

The culminating project for the Master of Science in Management and Organizational Leadership will have students apply the research skills they learned throughout the program in conjunction with the leadership and management knowledge they have garnered to complete a research project of their choosing. Students will develop a research methodology best suited to the problem they identified in MOL 620 to explore in this course. Students will collect data and tabulate (quantitative or qualitative) and use their findings to present recommendations towards the problem they identify. The project will include a literature review, methods section, data collection and analysis, and recommendations. 3 credits

MOL-632 Organizational Development and Change

This course will focus on issues of business strategy and planning, with an emphasis on organizational structures and processes. Topics will include change management, team development, and continuous improvement practices and experiences. Case studies will be utilized to demonstrate the transformation of business policies and procedures to effectively achieve strategic goals. 3 credits

Master Business Administration (MB)

MB-512 Ethical Issues in Business

This course examines business ethics from both theoretical and applied points of view. Students will utilize fundamental ethical theory to analyze and explain contemporary business conditions and current events. Students will be asked to define their responsibilities as an individual and as part of a group, an organization, and society

as a whole. Ethical issues in a variety of business areas will be considered; such as finance, marketing, human resources, and international. The focus will be on developing informed responses to the needs of a variety of stakeholders in making ethically-sound business decisions. Throughout the course, students will be required to demonstrate effective communication skills, both oral and written. 3 credits

MB-515 Economic Theory and Application

This course explores the basic concepts of macroeconomics and microeconomics with an emphasis on applying these theories to management decision making. Students will examine issues involved in operating effectively in a market-oriented economy and the measurement of economic performance. Topics include: national income and aggregates, fiscal and monetary policy formation, and price and output determination under various competitive situations. Through course assignments, students will demonstrate analytical skills as well as effective communication skills. 3 credits

MB-516 Organizational Behavior

This course examines the theoretical assumptions of organizational behavior and the issues and challenges that arise when managing and leading. Students will investigate the interrelationships between the individual, the group, and the organization. The course will emphasize managerial practices needed in a variety of settings and the application of these methods to realistic situations. Students will be required to demonstrate effective communication skills throughout the course. 3 credits

MB-518 Marketing Concepts and Strategies

This course introduces students to the techniques and processes of planning, creation, valuation, distribution, and sale of products and services. Students will learn how to segment markets and to identify target markets, survey markets, and interpret data. Students will explore the challenges and ethical issues facing marketing managers. During this course, students will analyze strategic marketing cases that will allow students to exhibit the ability to describe and integrate the key activities of marketing and demonstrate effective analytical, oral presentation, and written communication skills. 3 credits

MB-521 Managing Human Resources

This course examines the design of formal systems and the functions performed in organizations to ensure the most effective use of human resources. Emphasis will be on strategies used by managers for the recruitment, retention, and development of human resources to produce a positive workplace environment. Consideration will be given to the legal and ethical issues encountered by managers. 3 credits

MB-550 Special Topics

Selected topic studied in-depth within a Management and Business frame of reference. 3 credits

MB-580 Internship

The MBA Internship provides an opportunity for MBA students to complete an internship with a community nonprofit or for-profit organization under the supervision of a faculty member. The MBA Internship requires completion of MB 660 and the approval of a business plan developed to address a management-related issue or opportunity in which students apply principles and frameworks from the MBA curriculum. The MBA Internship serves as a transition for students from education to professional career. P: MB 512, MB 515, MB 516, MB 518, MB 611, MB 614, MB 636, MB 638, MB 660. 3 credits

MB-611 Quantitative Research for Managers

This course focuses on the application of quantitative analysis in the business environment. The concepts covered include probability distributions, decision analysis, regression analysis, forecasting techniques, linear programming, sensitivity analysis, project management, and simulation models. These concepts provide quantitative skills for research used in completing the capstone project. 3 credits

MB-612 Financial Theory

In this course, students will study the tools and methodologies utilized by financial managers. Students will analyze financial information with emphasis on utilizing this information to make effective and ethical managerial decisions. Topics will include forecasting and planning, investment and financing decisions, cash flows, and financial markets. Students will demonstrate advanced understanding of these topics by analyzing case studies based on real world situations. P: MB 520. 3 credits

MB-614 Information Systems Issues for Managers

This course examines the principles and issues of managing an information systems service function in a business. Current technologies available for computing and communicating will be explored from the viewpoint of a manager. Students will develop an understanding of how to select the most appropriate technology to meet a particular information need. Topics to be considered include training, evaluation, security, and ethical issues. Case studies will be used to provide examples. 3 credits

MB-629 Advanced Corporate Financial Management

This course will cover advanced topics in corporate finance. Topics will focus on financial projections and modeling, capital structure optimization, equity and debt financing, capital budgeting, cash flow analysis, dividend policy, valuation, and corporate governance issues. P: MB 612. 3 credits

MB-632 Organizational Development

This course will focus on issues of business strategy and planning, with an emphasis on organizational structures and processes. Topics will include change management, team development, and continuous improvement practices and experiences. Case studies

will be utilized to demonstrate the transformation of business policies and procedures to effectively achieve strategic goals. 3 credits

MB-633 Derivatives Markets & Risk Management

The course will provide an in-depth understanding of the markets for derivatives. Topics will include the following: stock option pricing and strategies, valuation of forward and futures contracts, credit default swaps, arbitrage, Value at Risk (VAR), and advanced forms of risk management. P: MB 612. 3 credits

MB-634 Survey of Operations Management

This course addresses the issues of plan implementation and the management of operations in a variety of organizations. The course will focus on diverse activities; such as determining the size and type of production process, purchasing, planning and scheduling the flow of materials, and the nature and content of inventories. Emphasis will be placed on the strategic and tactical skills needed to manage effectively and to assure product quality. P: MB 513. 3 credits

MB-636 Legal Issues in Business

In this course, students examine the legal and ethical aspects of business decision making. The current business environment will be examined in relation to domestic and international law, federal and state regulations, as well as local statutes and ordinances. The social and moral aspects of decision making will also be discussed. Students will be required to analyze realistic problems from these perspectives. 3 credits

MB-638 Financial Statement Analysis

This course will provide students with an understanding of how firms communicate through financial statements. Students will examine the use of financial statement analysis as an integral part of the strategic analysis of firms. In examining financial planning concepts, students will create pro-forma spreadsheets. The regulatory and ethical issues related to financial statement preparation and presentation will be examined. Case studies will be utilized to demonstrate the practical application of financial statement analysis and projections. 3 credits

MB-644 Management of Projects

Advanced course on technical aspects of project management. Covers cost, quality, time, scope management, project plan development using critical path and critical chain analysis tools, change control, management reporting, and use of project management software to support project execution. P: MB 643. 3 credits

MB-645 Leadership of Projects

Advanced course on human aspects of project management. Covers team building and teamwork, communications, stakeholder management, influence without authority, resource management, procurement and negotiations. P: MB 643. 3 credits

MB-646 Healthcare: Law, Policy and Systems

This course will examine the history and structure of the U.S. healthcare system as well as current trends and issues. The course will assess the impact on stakeholders within the healthcare system of legal, regulatory and health policy developments. Legal oversight, government regulation and health policy will be viewed from within the provider, payer and patient system perspectives, with case studies utilized to allow students the opportunity to assess the changing relationships among these stakeholders within the changing and dynamic health care industry. 3 credits

MB-647 Financial Management of Healthcare Organizations

In this course, students will be taught and asked to apply a variety of financial tools and techniques that they will commonly encounter in the healthcare field. These analytical exercises will be the foundation for teaching students how to make financial decisions within a healthcare setting as a provider organization, payer source or managed care entity. Case studies will be used to give students the opportunity to apply their learning in the areas of company valuation, pricing and risk-sharing arrangements. 3 credits

MB-648 Healthcare Informatics

This course will focus on the role of information technologies and systems in the healthcare field. Students will explore the history and development of I.T. applications in a healthcare setting and the impact of those applications on the quality of patient care. Topics will include telemedicine, electronic medical records, and Big Data applications. Students will also focus on information systems more broadly and their relationship to healthcare industry trends. 3 credits

MB-657 Fraud Investigation

In this course, students will look at the proactive and reactive areas of fraud auditing and investigation. Students will examine decision making for the prevention, detection, investigation, and reporting of fraud. Different types of management fraud will be covered as well as discussions on consumer fraud, tax fraud, and identity fraud. 3 credits

MB-658 Taxation of Business Entities

In this course, students will examine the taxation of corporations, partnerships, and sole proprietorships. Students will prepare tax returns for business entities and explore the issues involved in tax planning and preparation. Problems will be worked manually and on the computer using tax preparation software. Topics include an overview of the different forms of business entities and their income tax classifications, gross income, business deductions, and tax liability. 3 credits

MB-660 Strategic Management Capstone

In this course, students will integrate the skills and knowledge learned in previous courses and apply these to developing effective and ethical strategies to solve business problems. The course will involve collaboration with a community organization and

the identification of a business problem, on the basis of which students will develop a business plan, to be implemented in the MB 580 Internship. P: MB-512, MB-515, MB-516, MB-518, MB-611, MB-614, MB-636, MB-638. 3 credits

MB-660_23 Strategic Management Capstone

This course examines issues and problems that managers face in today's competitive and global business environment. Through the case study approach, students will integrate the skills and knowledge learned in previous courses and apply these to developing effective and ethical strategies to solve business problems. Students will be expected to demonstrate advanced written and oral communication skills. 3 credits

MB-661 Accounting Research Project

In this course, students will assess their accounting knowledge by completing practice exams from the Uniform Certified Public Accountants Examination. Based on the results, students will independently develop an accounting project focused on an area that needs further development. The extent and format of the project will be agreed upon with the instructor. Students will present their findings to the class at the end of the course. 3 credits

Psychology (PY)

PY-528 Life-Span Human Development

In this course, the development of the individual is examined from birth through the final stages of life in old age. The major developmental and psychological tasks for each stage of development are explored, as well as the family/psychosocial challenges that may present during those critical periods. An emphasis will be placed on the role of cultural context throughout development and prominent theoretical perspectives in the field. 3 credits

PY-530 Theories of Counseling

This course provides a survey of major theories of counseling, including the principal psychodynamic, humanistic, and cognitive-behavioral approaches. In addition to covering traditional schools of thought, emphasis is placed on contemporary developments in the area of time-limited treatment and the special difficulties inherent in this change in standard and clinical practice. 3 credits

PY-531 Psychological Assessment

This course will familiarize students with the general theory of testing and with various methods of personality and cognitive assessment. Commonly used clinical measures, clinical interviews, standardized tests, and projective drawing tests receive the most attention. Basic scoring and interpretation of selected tests will be covered. In addition, an overview of psychological assessment practice in other areas will be provided. The course will also cover ethical standards governing the development and use of tests and

measures. The course will contribute to the development of clinical skills and critical acumen, enabling students to evaluate clients, tests, and test reports effectively. 3 credits

PY-532 Personality Structure

Exploration of major theories of personality, with emphasis on the psychodynamic approaches most influential among mental health professionals generally and art therapists in particular. The classical psychoanalytic drive/conflict model, the ego analytic defense/adaptation model, relational approaches (e.g., interpersonal and object relations schools), Jungian, humanistic/existential, and cognitive/behavioral approaches will be considered. Students are required to read primary sources and evaluate the influence of those theories on clinical thinking. In addition, there will be a brief review of each theorist's biography in its historical context and how the prevailing intellectual climate of that era shaped the formulation of each theory. 3 credits

PY-533 Psychopathology

This course provides an overview of abnormal psychology, including cognitive-behavioral, psychodynamic, and neuropsychiatric, and socio-cultural perspectives as well as descriptive psychopathology. The course also entails a thorough grounding in the official psychiatric diagnostic classification system (currently DSM-IV) that is used by all hospitals, clinics, and rehabilitation facilities as per requirements of third-party payers and treatment review boards. 3 credits

PY-534 Research Methods and Quantitative Analysis

This course includes an examination and explanation of basic research strategies and statistical procedures. Students are required to read and interpret current research in art therapy, plan an empirical study, analyze and explain data, and write in APA style. Ethical standards for research as stated by the American Psychological Association will also be reviewed. 3 credits

PY-535 Career Counseling

Through an examination of career development theories and decision-making models, the student will gain an understanding of career development planning, organization, implementation, and evaluation. The interrelationships among work and other life roles will also be explored. 3 credits

PY-536 Case Management

This course examines concepts and principles of case management practice with special populations such as older adults, children and families, persons with serious and persistent mental illness, substance abuse, and persons with chronic disease and those facing end of life decisions. The core functions of case management practice in a range of settings are addressed in relationship to issues of diversity, vulnerability, and empowerment. 3 credits

PY-537 Counseling Techniques

This course is an intensive practical experience in counseling techniques to help students attain competency in the application of theory in the counseling relationship. 3 credits

PY-538 Social and Cultural Issues in Counseling

Social position (including socioeconomic status and gender identity) and cultural identity affect one's understanding of psychological disturbances and response to treatment. In an increasingly multicultural, multiethnic, multigendered society, counselors need to develop the cultural literacy necessary to work effectively with clients from varied backgrounds. This course strives to develop awareness and competence in these areas. 3 credits

PY-539 Program Evaluation

This course provides knowledge, theory, and skills needed for the systematic assessment of the effectiveness of psychosocial intervention programs: evaluation of outcomes of treatments provided by human services agencies. Emphasis will also be placed on program planning and evaluation models that are widely used in human services. 3 credits

PY-540 Organizational Behavior and Group Dynamics

This course examines the theoretical assumptions of organizational behavior and the issues and challenges which arise when managing and leading. Students investigate the relationships between the individual, the group, and the organization. Students also explore the various stages of groups, including pre-group assessment and screening of group members, group development, the initial stage, the transition stage, the working stage, and the ending stage of groups. Ethical and multicultural issues as they apply to groups are examined. 3 credits

PY-541 Addictions Counseling

This course provides an examination of the major approaches to understanding and treating substance-related disorders. It also examines the classifications of drugs, their pharmacological action, the process of addiction and recovery, treatment resources, and the legal and ethical guidelines for working with substance abusers. 3 credits

PY-542 Career Counseling and Vocational Rehabilitation

Through an examination of career development theories and decision-making models, the student gains an understanding of career development planning, organization, implementation, and evaluation. The interrelationships among work and other life roles are also explored. Students are also introduced to counseling theories related to vocational rehabilitation. 3 credits

PY-544 Group Dynamics and Counseling

This didactic-experiential course will both familiarize students with major theories of group dynamics (e.g., how groups form and evolve over time, different types of groups, etc.) and the methods of leading or facilitating counseling groups (e.g., psychoeducational sessions, encounter-style groups). 3 credits

PY-545 Professional, Ethical, and Legal Issues Seminar I

This course is an orientation to the profession of counseling. This includes its historical development and the evolving professional identity of the counselor. Most class time and outside assignments, however, will focus on the legal and ethical issues affecting mental health care providers generally and counselors in particular. 1.5 credits

PY-546 Professional, Ethical, and Legal Issues Seminar II

This course is an orientation to the profession of counseling. This includes its historical development and the evolving professional identity of the counselor. Most class time and outside assignments, however, will focus on the legal and ethical issues affecting mental health care providers generally and counselors in particular. 1.5 credits

PY-547 Spiritual Issues and Religious Identity in Counseling

Both religious identification (a social-cultural phenomenon) and personal spirituality influence how we lead our lives, how we respond to conflict and stress, and how we construct meaning in life. Counselors should develop competence in appreciating and working with their clients' various approaches to spirituality. This course introduces theories and methods for integrating spirituality (e.g., meditational practices, prayer, and faith-based healing traditions) into the counseling process. 1.5-3 credits

PY-548 Trauma and Crisis Intervention

Stress can be a source of learning and growth, but also of anxiety and turmoil; most mental disorders result, at least in part, from unmanageable levels of life stress. Extreme stress can produce traumatization and result in lasting changes to mental and neurobiological functioning. This course addresses the nature of stress and trauma as well as methods of counseling people who are confronted with acute crisis or the aftermath of traumatic experiences. 1.5 credits.

PY-549 Addiction and Recovery

This course provides an overview of addictive behaviors (emphasizing substance use disorders) and methods of counseling individuals who are abusing or dependent on psychoactive drugs or other forms of addiction. It is geared toward counselors who do not intend to specialize in this area, but who recognize the need to be prepared to work with the large numbers of potential clients whose clinical presentation includes substance abuse. 1.5 credits.

PY-550 Special Topics

Selected topic studied in-depth within a psychological frame of reference. 3 credits

PY-551 Clinical Assessment I: Understanding and Utilizing Appropriate Instruments

This course will familiarize students with the general theory of testing (psychometrics) and with various standardized and unstandardized assessment methods. Clinical and structured interviews, commonly used self-report measures (such as the 16PF), and some simpler performance-based tests (such as sentence completions) will be covered. Students will develop interviewing skills and master the basic scoring and interpretation of selected tests. Ethical standards governing the development and use of tests and measures will be covered. The course will contribute to the development of clinical skills and critical acumen, enabling students to evaluate clients, tests, and test reports effectively. 3 credits

PY-553 Clinical Assessment II: Personality Dynamics

Theory and practice of assessing affective functioning. Students will learn to administer, score, and interpret the results of several widely used instruments. These will include self-report inventories (such as the MMPI-2) and performance-based (or "projective") tests (such as the Thematic Apperception Test). Also included will be observer-rated instruments (such as the CBCL-R or BASC) and clinical rating scales based on structured interviews (such as the Hamilton Rating Scale for Depression). Students will also learn to integrate personality theories with test results. Report writing, application of test findings to intervention plans, and the therapeutic use of assessment will also be discussed. 3 credits

PY-554 Advanced Counseling and Psychotherapy I: Cognitive-Behavioral Methods

Cognitive-Behavioral Therapy (CBT) has become the most widely practiced group of psychotherapies. These are empirically supported treatments; extensive clinical research demonstrates their efficacy. Students will learn to apply several of these approaches, such as Ellis' Rational-Emotive Behavior Therapy (REBT), Aaron T. Beck's approach, Dialectical Behavior Therapy (DBT), stress inoculation training, and/or mindfulness-based techniques. The emphasis will be on mastery of theory and technique in a few approaches, rather than on broad (but necessarily superficial) coverage. 3 credits

PY-555 Advanced Counseling and Psychotherapy II: Couples and Family Therapy

Using a learning-centered educational approach, students will be introduced to systemic models of couple and family therapy including both foundational theories and integrative, common factors approaches. A significant focus of this course will be on the practical counseling skills and techniques that have emerged from these theories. Students will be introduced to course concepts and demonstrate their grasp of course material through

a combination of lecture, videos, class discussions, role plays, reflection, and writing activities. Additionally, students will be asked to apply concepts to their own lives and experiences to enhance their self-awareness as developing mental health counselors. 3 credits

PY-556 Advanced Counseling and Psychotherapy III: Integrative Techniques

In this course, one specific theoretical approach is selected for semester-long immersion as the common basis for all students. Each student will then select a theory of his/her own choice to work on integrative skills throughout a series of experiential labs, role-play exercises, case analyses, and presentations. Throughout the semester, each student will benefit from integrating two theoretical approaches in the application of counseling skills and case conceptualization. 3 credits

PY-570 Counseling Practicum

This initial field experience will enable students to observe and participate in assessment and treatment of cases in a community-based clinic or other agency. A minimum of 120 hours on site is required (equivalent to 8-10 hours per week). In addition to on-site professional supervision, students will meet regularly with a faculty member. All practicum sites must be approved by the program. Note that most sites are likely to require daytime hours during the regular work week. Students may register for practicum only with the permission of the program director. 3 credits

PY-577 Advanced Seminar in Case Conceptualization

In this course, students will develop increased skill in the process of integrating data from multiple sources (such as interviews, tests, and experiences in therapy) with theoretical concepts (such as cognitive distortions, defense mechanisms, and relational styles) to form deeper understanding of the individuals with whom they engage in treatment. The class will draw on case material (both cases prepared by the instructor and cases being seen by student interns) to practice these skills, which enable therapists to move beyond mechanistic modes of treatment in favor of a richer, more personalized approach. 3 credits

PY-579 Counseling Internship I

The internship is one of the culminating experiences of the program. Interns will work at a community-based clinic or other agency for a total of at least 600 hours (300 per semester), equivalent to about 20 hours per week. This work will include assessment and treatment of individual clients and/or counseling groups of clients. Interns will assume increasingly independent roles over the course of the year. In addition to on-site professional supervision, students will meet regularly with a faculty member. Case material also may be discussed in concurrent seminars. All internship sites must be approved by the program. Note that most sites are likely to require daytime hours during the regular work week; it will be difficult or impossible to maintain full-time regular

employment during the internship. Students may register for internship only with the permission of the program director. 3 credits

PY-580 Counseling Internship II

The internship is one of the culminating experiences of the program. Interns will work at a community-based clinic or other agency for a total of at least 600 hours (300 per semester), equivalent to about 20 hours per week. This work will include assessment and treatment of individual clients and/or counseling groups of clients. Interns will assume increasingly independent roles over the course of the year. In addition to on-site professional supervision, students will meet regularly with a faculty member. Case material also may be discussed in concurrent seminars. All internship sites must be approved by the program. Note that most sites are likely to require daytime hours during the regular work week; it will be difficult or impossible to maintain full-time regular employment during the internship. Students may register for internship only with the permission of the program director. 3 credits

PY-581 Action Research Project

Students conduct original empirical research, typically evaluating the effectiveness of a specific human services program. This program may be designed by the student or be part of the usual psychosocial interventions provided by an agency. This course may be taken in lieu of 6 credits of field experience by students who have a minimum of five years' direct client or supervisory experience in an accredited human service agency within the last eight years may waive the field experience. who have extensive experience in a human services agency. 6 credits

PY-583 Drugs and Behavior I: Basic Science

This course addresses the nature of psychoactive drugs and their modes of action on the functions of the human brain. Anatomy and localization of function in the brain will be reviewed. Major topics will include neurochemistry (e.g. neurotransmitters and receptor mechanisms), psychopharmacology (e.g. pharmacokinetics and pharmacodynamics), the therapeutic uses of psychotropic medications, and basic psychological processes involved in drug self-administration or abuse (e.g. opponent process theory, reinforcement, and classical conditioning). 3 credits

PY-584 Ethical and Professional Issues in Addiction Counseling

This course concerns ethical, legal, and administrative issues that confront substance abuse counselors. The use of values to inform ethical decision-making in ambiguous situations will be practiced. General principles (e.g., beneficence, professionalism in relationships, confidentiality and its limits, and recognition of the boundaries of one's expertise) as well as specific regulatory guidelines (e.g., rules governing credentials, reimbursement, appropriate documentation, and liability) will be discussed. Case material will be used extensively to promote reflection and discussion. 1.5 credits

PY-585 Drugs and Behavior II: Applications

This course concerns the roles played by psychoactive drugs in human lives, both individually and in society. Topics include the epidemiology of substance use and misuse, diagnostic criteria for substance-related disorders, signs and symptoms of intoxication and withdrawal for different classes of drug, interactions of substance use with other disorders (medical or psychiatric), and the effects of substance use on the adaptive functioning and well-being of users, family members, and the wider community. Substances covered include alcohol, nicotine, caffeine, opiates, stimulants, sedatives, cannabinoids, hallucinogens, inhalants, and less common varieties. 3 credits

PY-586 Culture, Gender, and Special Populations in Addictions

This course concerns the many ways in which the background or identity of a client affects behavior, thinking, and emotion relative to substance use and its disorders. Cultural and religious norms and attitudes toward alcohol and other drugs, gender differences, sexual orientation issues, the presence of co-occurring disorders (e.g., MICA), and medical problems (e.g., HIV) will be considered. In addition to their impact on substance use, attention will be paid to the ways in which these factors may affect the process of counseling and the relationship between counselor and client. 1.5 credits

PY-587 Addiction Counseling I: Core Concepts and Competencies

This course begins the process of combining general counseling competence with specific knowledge and expertise in the domain of substance abuse. Different models of substance abuse or addiction as well as associated treatment approaches will be studied, compared, and evaluated. These will include broadly medical, psychological, and quasi-spiritual modalities. Counseling goals and strategies will be understood in terms of stages of change and client readiness. Standard interviewing techniques, psychoeducational interventions, and group dynamics will be considered. Attention also will be paid to practical issues such as record keeping, case management, and consultation with members of other helping professions. 3 credits

PY-588 Clinical Assessment of Substance Use Disorders

This course concerns routine and specialized procedures for assessment of substance use and co-occurring disorders, beginning with the elicitation of informed cooperation from clients and selection of appropriate measures. Instruments covered will include clinical and structured interviews, behavioral observation, clinician rating scales, mental status examinations, and standardized self-report and observer-rated measures of symptoms and personality traits. The use of assessment data in case formulation, the synthesis of clinical findings into clear, useful written reports, and the therapeutic presentation of assessment feedback to clients also will be emphasized. 1.5 credits

PY-589 Addiction Counseling II: Advanced Techniques

This course will introduce students to specific techniques used by substance use counselors, with primary emphasis on evidence-based treatments. Didactic and

theoretical presentations will be interspersed with practical demonstrations and supervised practice of skills. The approaches taught may vary, but will include some of the following: motivational interviewing, the community reinforcement approach (with family involvement), relapse prevention training, cue exposure methods, and standard psychoeducational interventions (e.g., BASICS and/or values clarification). 3 credits

PY-591 Treatment Planning and Evaluation in Addictions Counseling

This course concerns the integration of diagnostic and other assessment findings into individualized treatment plans, the sensitive presentation of recommendations to clients, the collaborative development of treatment goals with clients, the translation of broad goals into a sequence of potentially attainable, measurable objectives, and the selection of appropriate interventions. Methods of monitoring client progress toward objectives, modifying objectives based on results or new findings, and evaluating the success of individual cases or treatment programs also will receive attention. 1.5 credits

PY-597 Thesis Research Project I

The master's thesis is another of the culminating experiences of the program. Students will conceptualize and carry out an original empirical study related to clinical mental health counseling. This may involve evaluating a treatment program, validating an assessment technique, using assessment data better to understand groups of clients, or other projects. Students will meet regularly with a faculty sponsor throughout the process. It is strongly advised that students develop thesis projects that can be conducted at their internship sites. In this way, the two capstone experiences will be mutually reinforcing. 1.5 credits

PY-598 Thesis Research Project II

The master's thesis is another of the culminating experiences of the program. Students will conceptualize and carry out an original empirical study related to clinical mental health counseling. This may involve evaluating a treatment program, validating an assessment technique, using assessment data better to understand groups of clients, or other projects. Students will meet regularly with a faculty sponsor throughout the process. It is strongly advised that students develop thesis projects that can be conducted at their internship sites. In this way, the two capstone experiences will be mutually reinforcing. 1.5 credits

Public Administration (MP)

MP-500 Introduction to Public Administration

This course is a basic introduction to public administration. The course will introduce students to the theory and practice of the administration and management of nonprofit and public sector organizations and operations as well as politics, policy, and the bureaucracy. Topics include the role of bureaucracy in the political process, theories of

public organizations, bureaucratic discretion and accountability, policy implementation, and the changing nature of public administration. 3 credits

MP-504 Labor-Management Relations

In this course students will be introduced to the basic issues that arise in the public sector collective bargaining process. Students will explore the evolution of labor-management relations and learn the importance of establishing and maintaining a strong, productive relationship between labor and management. 3 credits

MP-507 Urban Policy

In this course students will examine unique policy challenges in cities. Students will analyze how public policies have helped address, compounded or been adapted to those challenges. Students will learn how to evaluate policy outcomes through the utilization of such concepts as sustainability, resilience and environmental justice. 3 credits

MP-509 Grant-Writing

This course will prepare students to be able to develop competitive grant proposals for both government and private foundation funders. Topics covered include: establishing development goals, identifying grant opportunities, developing major-gift campaigns, and aligning fundraising strategies and goals with institutional mission. 3 credits

MP-511 Politics and Public Policy

This course will enable students to examine the political processes that influence the formation of public policies. Students will explore current issues in the public policymaking process and how partisan politics play a role in the formulation and implementation of policies at all levels of government. 3 credits

MP-512 Ethical Issues in Public Administration

This course explores how ethical considerations are integrated in public policy choices. The social and moral aspects of decision making will also be discussed. Students will be required to analyze realistic problems from these perspectives. The course will also treat the legal, regulatory and political obstacles to ethical policy choices. The impact of technology on ethical decision-making will be addressed as will achieving an "ethical consensus" in the policy-making process when society is divided by differing values and polarized political opinions. 3 credits

MP-521 Performance Measurement and Management

The course focuses on how performance is becoming increasingly important in public and non-profit settings and explores performance-based management approaches. Students will learn how to identify appropriate measures and how implement a performance measurement system and manage for performance in the public sector. Emphasis will be placed on establishing performance measurement systems, identifying, collecting, and analyzing performance information, presenting performance analysis

results, and utilizing performance information. Management tools covered will include benchmarking, performance dashboards, and balanced scorecards. 3 credits

MP-550 Special Topics in Public Administration

Students will explore contemporary topics in public administration, the public policymaking process, and leadership. The focus will be placed on the development of practical skills that can be adapted to any public service setting. Examples of special topics include Performance Measurement and Management in public administration. 3 credits

MP-581 Implementing Public Policy

This course will investigate how domestic policy, especially social welfare policy, is implemented, tracing policy from federal laws to administrative agency regulations and the local implementation of the program. This course is intended to expose the student to practical problems of implementing policy and the solutions required at a grassroots level to assure success. Students will be required to apply concepts by analyzing policy implementation in a public or non-profit setting of their choice. 3 credits

MP-611 Research Methods in Public Administration

This course examines various methods for designing and conducting empirical research in the field of Public Administration. Students will follow a straightforward step-by-step procedure for starting a social science research project within the field of public administration with topics ranging from formatting a viable research question to creating practical plans for sampling, data collection, data analysis, and dissemination of results. At the end of the course, students will have a complete research proposal that they will implement in their final MPA course, MP 630- Applied Research Project. 3 credits

MP-630 Applied Research Project

The culminating project for the Master of Public Administration will have students apply the research skills they learned throughout the program to complete a research project of their choosing. Students will be required to select a research topic relevant to the field of public administration at the beginning of this course and develop this research topic into a research concept paper composed of all the aspects of research covered throughout the course adapted to their specific topic. Course will be taken in the student's final semester. P: MP 611. 3 credits

Reading & Language Arts (RLA)

RLA-501 Theory and Practice in the Fundamentals of Language and Literacy

This course, one of the three core courses in the initial summer of the AAP Program for Literacy Specialists in Reading/Language Arts, focuses on the interplay between oral language and print-based language development that reading specialists need to understand and apply in everyday practice. More specifically, the course focuses on the

study of evidence-based theory about the major evidence-based components of reading and their development that include: phonological awareness, phonics, word recognition, fluency, vocabulary, syntax, comprehension processes, and morphology. As a major part of the course, students are asked to read, understand, and critically evaluate empirical research that focuses on how the aforementioned components contribute to reading success and the impact that learner differences (e.g., students with reading disabilities) have on the development of those component skills.

RLA-502 Assessment, Test Interpretation, and Program Planning in Reading and Language Arts

Candidates learn basic psychometric concepts; administration, scoring, and interpretation of evidence-based components of reading development; the selection of appropriate literacy assessments for specific purposes such as monitoring student progress and program efficacy; and how to articulately present assessment findings to various constituencies.

RLA-503 Literacy Coaching

In this course, candidates will increase their self-knowledge about their motivation, problem-solving skills, and responses to conflict; learn how to adapt their behavioral and communication style to work more effectively with others; and explore and discuss facilitation and presentation skills and the use of protocols.

RLA-550 Fall Seminar Series

Participants in the Fall Seminar Series engage in four separate five-hour Saturday seminars. Fall seminar topics include diversity & equity, digital literacy, intervention & tutorial, and K-5 elementary literacy best practices. Students engage in a deep exploration of each topic, growing their content knowledge, and reflecting on their application of new learning.

RLA-551 Spring Seminar Series

Participants in the Spring Seminar Series engage in five separate five-hour Saturday seminars. Spring seminar topics include dyslexia, English Language Learners, Writing instruction, new initiatives in reading, and Grade 6-12 Secondary best practices. Students engage in a deep exploration of each topic, growing their content knowledge, and reflecting on their application of new learning.

RLA-554 Clinical Dyslexia Tutorial

Participants in the Clinical Dyslexia Tutorial use the Japanese Lesson Study and Diagnostic Tutorial models to co-plan literacy tutorial lessons based on prior student behavior, engagement, learning, and process. All tutorial lessons are based on cognitive and achievement strengths and weaknesses, prior knowledge, learning profiles and passions and employ research-based methods and materials to teach phonological processing, phonic decoding and encoding, syntactic structures, morphology and other

semantic markers. Each group debriefs as soon as possible after the research lesson ends and uses the data to plan the next lesson. The roles of teacher, facilitator, recorder, and final commentator rotate through the small groups.

RLA-555 Clinical Dyslexia Tutorial II

Participants in the Clinical Dyslexia Tutorial use the Japanese Lesson Study and Diagnostic Tutorial models to co-plan literacy tutorial lessons based on prior student behavior, engagement, learning, and process. All tutorial lessons are based on cognitive and achievement strengths and weaknesses, prior knowledge, learning profiles and passions and employ research-based methods and materials to teach phonological processing, phonic decoding and encoding, syntactic structures, morphology and other semantic markers. Each group debriefs as soon as possible after the research lesson ends and uses the data to plan the next lesson. The roles of teacher, facilitator, recorder, and final commentator rotate through the small groups.

RLA-580 Collegial Coaching

Candidates collaboratively develop and coach a colleague's literacy project with supervision by clinical faculty. At the end of the practicum, candidates submit a descriptive and reflective final paper.

RLA-581 Comprehensive Tutorial

Building on the experience from the dyslexic tutorial, candidates tutor a student with reading challenges from their home district with supervision by clinical faculty. As with the dyslexic tutorial, candidates begin with a review of previous testing and teacher reports and plan a tutorial program; however, this tutoring program is much longer and therefore involving more progress monitoring with appropriate data analysis and a comprehensive written tutorial report.

RLA-582 Professional Project

During the final, culminating Capstone Project the candidates consolidate their foundational knowledge with their teaching, assessment, and coaching knowledge and practice by researching, planning and presenting full-day professional development workshops with daily supervision from the AAP Instructional Coordinator. The educators who attend these seminars are members of the beginning cohort, former AAP completers, and invited guests of the presenters.
