Master of Science in Human Services and Addiction Counseling Certificate

(57 credits)

Human Services, M.S. and Addiction Counseling Certificate

The Master of Science in Human Services is a graduate professional degree designed to prepare students for professional positions in psychosocial health and human services in a variety of public and private agencies. Graduates are empowered with advanced skills for serving clients within the context of their communities and environments.

The program promotes educational access to students from a wide range of backgrounds, provides a transformative educational process in which students gain advanced professional knowledge and skills, and builds students' capacity as informed, effective and ethical citizens.

The program offers two tracks, an 18 month 39-credit degree in Human Services and a 2-year graduate degree in Human Services and Addiction Counseling that includes all the academic preparation necessary to be eligible for the Licensed Alcohol and Drug Counselor (LADC) credential in the State of Connecticut once they have completed the state requirements for licensure.

Upon completing the program of study in Human Services, students will:

- Demonstrate the ability to advocate for clients through knowledge of community resources in the human services network.
- Demonstrate the ability to analyze major social issues, social problems, and current socio-political and socio-cultural events which affect human services.
- Demonstrate the ability to apply basic methods and techniques used to evaluate individuals with mental illness, developmental disabilities or cognitive impairments.
- Demonstrate the ability to implement common psychosocial treatment approaches based on key theories and related concepts.
- Demonstrate the ability to define achievable goals of counseling and contributions and limitations of various treatment modalities.
- Demonstrate the ability to understand and apply legal and ethical standards affecting the delivery of human services.
- Demonstrate the ability to assess behavioral, cognitive, affective, and environmental factors in order to identify and set long-term achievable client goals.
- Demonstrate the ability to understand psychological and socio-cultural aspects of normal and abnormal behavior, theories of causation and treatment approaches.
