

Admissions

Dual-Credit Partnerships

The Falcon Fast Track Program provides high school students with opportunities to earn college credit before high school graduation through concurrent enrollment, dual enrollment, and College Before College options. These experiences allow students to engage in college-level coursework, build confidence in their academic abilities, and begin their college journey early.

Program options include:

- **Concurrent Enrollment** – College courses taught at participating high schools that award both high school and Albertus Magnus College credit.
- **Dual Enrollment (On-Campus)** – College courses taken on the Albertus Magnus College campus that award both high school and college credit.
- **Dual Enrollment (Online)** – College courses offered through Albertus eLearning that award both high school and college credit.
- **College Before College** – High school seniors with a minimum 3.0 GPA may enroll in one Albertus Magnus College course at no cost and earn college credit. Credits earned through this option apply to college only and do not award high school credit unless approved by the student's school district.

The fee for Concurrent Enrollment and Dual Enrollment courses is \$65 per three-credit course. Each additional credit beyond three credits is assessed at \$20 per credit. College Before College students may enroll in one course at no cost.

Students who successfully complete courses through the Falcon Fast Track Program earn Albertus Magnus College credit and establish an official Albertus Magnus College academic record. Credits earned through the program may be transferable to other colleges and universities, subject to each institution's transfer credit policies. Albertus Magnus College cannot guarantee that credits earned through this program will be accepted by another institution for transfer or admission purposes.

If a student subsequently enrolls at Albertus Magnus College, credits earned through the Falcon Fast Track Program will become part of the student's permanent academic record and may affect cumulative grade point average, academic standing, and eligibility for certain academic programs, honors, scholarships, and financial aid in accordance with institutional policies. All program details, fees, and policies are subject to annual institutional review and may change without notice.
